Minerva mcgonagall husband

Professor Minerva McGonagall is already everyone's favorite teacher and a certified war hero, but believe it or not, she not only flashes in the existence of Harry Potter upon Harry Potter's arrival at Hogwarts. There is a complete, and often completely tragic, story behind the Head of Gryffindor House. She grew up in Scotland, for example, where she encountered several obstacles before even going to Hogwarts when she was an eleven-year-old girl. Even during the events of the Harry Potter series, McGonagall faced his own personal demons, losing friends and family that even book readers might not have heard of. JK Rowling had McGonagall's life, from childhood to the years after the Battle of Hogwarts, drawn from day one, and although little of his past is mentioned through the book series, the knowledge he has shared since then makes sense as to how his character is portrayed both in books, as in the films, where she is played by Dame Maggie Smith. So, right from the mind of Rowling herself, here are 15 things we never heard of Minerva McGonagall.

15 She is the first magical character introduced in the books. The only characters in the first chapter of Harry Potter and the Philosopher's Stone to be presented before McGonagall is the Dursleys. Before we leave Privet Drive, and long before we meet Harry, Vernon Dursley goes to work when he sees a tabby cat reading a map. Panicking about what it might mean, Vernon doubles down and discovers that the map has disappeared, but this sets in motion a series of peculiar occurrences on the day of Lord Voldemort's defeat at the hands of his young nephew. We don't know until Dumbledore and Hagrid arrive to leave Harry at the Dursley gate that the literate tabby cat was actually a witch, and before we heard anything about wands, potions or layers of invisibility, McGonagall provides a conveniently strange view of the wizard world. Although Dumbledore actually appears before her in the first film, she is at least presented before the Dursleys; McGonagall is the first female character to appear and the second character overall. 14 She is a Registered Animagus. We have all seen McGonagall in her animagus form, but film watchers and even some book readers may not be aware that she is one of seven animagi who registered with the Ministry of Magic during the 20th century. This is perhaps due to the complex magic and time it takes to become an Animagi, which James Potter and Sirius Black were able to master during their time at Hogwarts, becoming Animagi to keep Remus Lupin company when he became a werewolf. Anyone who wants to become an Animagi must hold a mandrake in your mouth for an entire month, using it to create a potion, which is elaborated for a long time and requires skilled transmogrification skills. McGonagall's affinity for transfiguration led to her desire to become animagus, and he sought help from Dumbledore in his senior year at school to achieve. An Animagus cannot choose the animal they will become, but is determined by their values and personalities. McGonagall became a wise tabby cat, while unregistered Animagi James and Sirius became a deer and a dog, and Peter Pettigrew and Rita Skeeter defined their inner self by transforming into a rat and beetle respectively. 13 Quidditch played for Gryffindor During his time at school, McGonagall was eventually ordered at Gryffindor, where he became a member of Quidditch's team (although his position on the team was unknown). In her senior year, McGonagall was knocked down from her broom through a brazen lack of a Slytherin player, leaving the pitch with a concussion. It was this fall that gave him a lifelong desire to see Gryffindor crush Slytherin on the quidditch pitch, and it was verbally known to spar with Snape, Slytherin's boss, on several occasions. Despite her insistence that Lee Jordan's comment is passed towards Gryffindor, she is not reluctant to insult Slytherin's team from the sometimes particularly tense stands. Interestingly, when his brother Malcolm arrived at Hogwarts a few years later, he would join Gryffindor's lineup alongside James Potter, who, contrary to popular belief, was a pursuer on the team, not a Seeker like his son. 12 Their classification took more than five minutes. As Harry, Hermione, and Neville ordered on arrival at Hogwarts, with Harry and Hermione almost being placed in Slytherin and Ravenclaw respectively, while Neville actually asked the Ranking Hat to place him in Hufflepuff, they did not reach the five-minute mark, which is a significant number in Hogwarts' history. Any witch or magician whose classification takes more than five minutes is traditionally referred to as a Hatstall, a name given to someone because of their infinite character traits that stop the Classification Hat from making a decision. There have only been two Hatstalls known in recent times. McGonagall was the first, as the Classification Hat wavered between Gryffindor and Ravenclaw for nearly six minutes. The Hat will take into account the student's choice to break a tie, so despite his infinite wisdom and quick wit, McGonagall was placed in Gryffindor. Peter Pettigrew is the second known Hatstall, almost being placed in Slytherin. The Hat eventually decided on Gryffindor, and despite Pettigrew's betrayal of the Marauders, the Hat defended his decision even before Pettigrew's self-sacrifice death. 11 named after A Greek Goddess There is a small story behind almost every name in Harry Potter, and although McGonagall is no exception, she has what might be called a two-halves name. Minerva is a divine name, chosen with foresight of character in mind, while McGonagall... not so much. Minerva is the Roman name of Athena, a Greek goddess, who defended courage, justice and strategy. Not only are these features of McGonagall, they are also characteristics you share with founder Godric Gryffindor, whose house would eventually be run, proving that it was in fact ordered correctly. In addition, Minerva was a wise goddess of schools and learning. McGonagall, meanies, derives from the Celtic name Conegall, which translates as the son of the bravest. However, that's not how he got his last name. McGonagall comes from the Scottish poet William Topaz McGonagall, regarded across the UK as one of the worst writers to have put ink on paper. This has nothing to do with his personality, according to JK Rowling, it was only that Rowling liked the name, and that he revealed the character's Scottish heritage. 10 She is a McGonagall of Half Blood born to Muggle Minister Robert McGonagall, and Isobel Ross, a talented witch who had renounced her powers to marry Robert, and thus defend the International Statute of Secrecy. Named after her witch grandmother, Minerva showed signs of magic from birth (even showing some level of control over her abilities), which was a disaster for Isobel, who had never told Robert of his magical powers. She eventually told her husband that instead of abandoning her, she agreed to the terms of the Statute of Secret, although she never knew the extent of her children's powers. The couple later had two children, Malcolm and Robert Jr., and Isobel, with Minerva's help, covered up the accidents their magic would cause. Isobel allegedly broke down when Minerva left home for Hogwarts, as her daughter was free to exercise her magical talents among her own species, while Isobel remained at home with a husband who never understood what she was capable of. 9 He went to school with Professor Sprout McGonagall and Pomona Sprout were close friends at Hogwarts, as Sprout arrived at school while McGonagall was in his sixth year. The couple remained in touch after McGonagall's seventh and final year, and both would return to Hogwarts as teachers and house chiefs. Sprout returned to Herbology and later became head of the Hufflepuff house, while McGonagall, of course, took Transfiguration and ran the Gryffindor house. Although it was never explicitly mentioned in the book or in the film series, their relationship is suggested in brief cases. They shared a commissioned side when the hateful Dolores Umbridge was appointed professor of Defense against the Dark Arts and gave a boring speech in Harry Potter and the Order of the Phoenix. After McGonagall's duel with Snape in Deathly Hallows, Sprout comes to his aid, forcing Snape to flee. The couple, with Flitwick's help, will protect Voldemort Castle, and despite Flitwick's protests, Sprout supports McGonagall's decision to protect the castle, and the two friends share a look of grim understanding. 8 He has won awards in Transfiguration Unsurprisingly, McGonagall was one of the outstanding of his year at school. She received prefect and Head Girl badges, and higher scores on her O.W.L and N.E.W.T. exams. He also dropped out of school Transfiguration Today: Most Promising Revelation Award. McGonagall released in Transfiguration from his first year. Even his wand, a spruce stick with a dragon heart rope core, was noticed by Olivander as particularly suitable for Transfiguration. He was taught that the song was Albus Dumbledore, an earlier winner of the magazine's award and regular subscriber, who later oversaw his transformation into an Animagus. Dumbledore was also an expert in Transfiguration, writing articles for the magazine during his time at Hogwarts. Bathilda Bagshot is another well-known subscriber to the magazine, and her knowledge of the Dumbledore family was due to her admiration for her work. Both Dumbledore and McGonagall are seen reading the magazine in the Harry Potter series, while also appearing in Fantastic Beasts and Where to Find Them. 7 She was engaged to a Muggle Despite her academic achievements, McGonagall was not so lucky in her personal life. After graduation, he returned home to Scotland for a past summer. There, Minerva, 18, met Dougal McGregor, the muggle son of a local farmer, and fell in love. The couple got engaged the same summer, when McGregor proposed in a plowed field, but Minerva canceled the marriage the next morning. Unwilling to live a lie like her mother, and turn her back on her career, she considered telling McGregor she was a witch. Instead, he confirmed the International Secret Statute, aware that he risked exposing his species if McGregor did not accept the truth. She gave no reason for her decision, and went to London a few days later, never to see McGregor again. McGregor died during Voldemort's first revolution, killed in the crossfire of a Death Eater anti-Muggle attack. It was a loss McGonagall would never live. His first job was at the Ministry When McGonagall arrived in London, Elphinstone Urquhart offered him a job at the Ministry of Magic. She was assigned to the Department of Implementation of the Magic Law, the largest department of the Ministry. The division in which he worked is unknown, but he could have been part of the Auror Office - where Harry and Ron would later work - or the Muggles Artifact Use Office -- where Arthur Weasley worked during the series. McGonagall received the job of Professor of Transfiguration by Dumbledore, presumably when he took the start of Armando Dippet as director of Hogwarts, and she left the Ministry after two years. However, he continued to work with the Aurors well into the First War of the Wizards, also known as The Rise of Voldemort. Refusing to join the Order of the Phoenix at the time due to the disapproval of the organization's Ministry, he spied on the Death Eaters in his Animagus form, bringing the Ministry's information about Voldemort's followers. 5 She was attacked by Aurors Ministry The relationship with the Ministry did not

last. During Professor Umbridge's reign as the High Inquisitor of Hogwarts in the Order of the she and a group of Aurors attacked Hagrid in an attempt to evict the unnatural giant environment (in her eyes) from the grounds of Hogwarts. While fifth-year students, including Harry, Ron, and Hermione, watched from the top of the Astronomy Tower, where they were in the midst of their O.W.L. exam, McGonagall rushed to intervene on Hagrid's behalf. Before drawing her wand, however, she was struck by four impressive spells on her chest. The quadruple spell nearly killed her, and she spent a brief period at St. John's Hospital. Mungo for magical maladies and injuries. Hagrid knocked out two of her attackers before fleeing, while Mrs. Pomfrey, matron of Hogwarts, stated that not one of them would dare attack McGonagall in broad daylight. He returned to Hogwarts as something new, except for the fact that he needed a cane from them. 4 He married his former chief McGonagall remained good friends with Elphinstone Urquart even after joining the Order after Voldemort's disappearance. Urquart used to party in Scotland, where he met with his former employee. He proposed to McGonagall at Madam Puddifoot's tea shop, but McGonagall, in love with McGregor, who was still alive at the time, politely rejected him. But that wasn't his last proposal. Undeterred, Urquart continued to visit Scotland, where he proposed to McGonagall several more times. Shortly after McGregor's death, McGonagall finally accepted when he asked the question during a summer walk through the grounds of Hogwarts. Urquart and McGonagall, who kept their last name, were happily married for three years. Urquart bought a country house in Hogsmeade, and McGonagall's nieces and nephews visited often. But his luck wouldn't last. Their marriage was interrupted when Urquart was killed by a bite of Poisonous Tentacula, after which she left the cabin and returned to her chambers in Hogwarts, where she saw the rest of her life. 3 She hoarded Voldemort McGonagall led the rebellion during the Battle of Hogwarts; taking out Alecto Carrow, evacuating underage students (and the Slytherins), animating the statues of Hogwarts to defend the castle, and being generally impressive. McGonagall was present when Voldemort paraded with Harry's dead body to his remaining allies, and when the battle resumed after the Centaurs attacked Death Passovers, the fighters were forced into the Great Hall. Then he faced the Dark Lord directly. Along with Kingsley Shacklebolt and Professor Slughorn, McGonagall maintained his own against Voldemort for a while. Once Molly killed Bellatrix, however, the three members of the Order of the Feninx were shattered by Voldemort's fury. When Harry revealed himself and asked that everyone stay out of his way, McGonagall and the rest watched from the When Harry's unarmed charm reversed Voldemort's Death Curse, McGonagall and his fellow teachers were some of the first to embrace the Child he lived. 2 Merlin's order was granted to him: First First That's Minerva McGonagall, O.M. (First Class) for you. The Order of Merlin is an award given by the Ministry for outstanding acts of bravery, discovery and entertainment within the wizard community. Other well-known recipients include Albus Dumbledore, who won the First Class award for his defeat of the dark wizard Grindelwald; Newt Scamander, whose second-class honor was bestowed for his services in the study of magical beasts; and Remus Lupin, who received a first-class wild honor, becoming the first werewolf to do so. Like Lupin, McGonagall won for his contribution to the Battle of Hogwarts and his loyalty to the Order of the Phoenix. The Order of Merlin has a controversial history, however, as Cornelius Fudge was awarded a First Class honor, while Peter Pettigrew won the First Class award for his heroic confrontation with Sirius Black (Pettigrew was later shown to have killed 13 Muggles during this confrontation), and Sirius Arcturus Black III's ancestor reportedly paid the Ministry a large sum of money for his First Class prize. It is perhaps for this reason that McGonagall has proved prouder of his subsequent appearance on Chocolate Frog cards. 1 She was appointed director of Hogwarts after the Battle of Hogwarts, McGonagall was reinstated as director of Hogwarts after Voldemort's defeat. She had previously held the position in The House of Secrets, when Dumbledore was fired as a result of Lucius Malfoy's meddling, and at the end of The Half-Blood Prince, when she briefly took Dumbledore's office after her death. Her contributions as a director include the hiring of former student and legend of the Battle of Hogwarts Neville Longbottom as Professor of Herbology, while she allowed Dumbledore's notes on The Tales of Beedle the Bard to be officially published. She remains at Hogwarts for the inscription of each of Harry and Ginny's three children, and appeared prominently at the events of Harry Potter and the Cursed Child, where Harry's second son, Albus, now a four-year-old student of Slytherin and Scorpius Malfoy's best friend, uses a Time-Turner to travel to 1995 in an attempt to save Lord Voldemort's Cedric Diggory. When the boys fix their mistakes and return to the original timeline, they are greeted by McGonagall, and reveal to him what they had done.
